

AUCKLAND REGIONAL COUNCIL

RESOURCE CONSENT

Granted pursuant to the Resource Management Act 1991

PERMIT NO. 31762

CONSENT HOLDER: **Winstone Aggregates, a division of Fletcher Concrete & Infrastructure Limited**

FILE REFERENCE: **7960**

CONDITIONS OF CONSENT

Duration of Consent: This consent shall expire on 31 December 2020 unless it has lapsed, been surrendered or been cancelled at an earlier date pursuant to the Resource Management Act 1991.

Purpose of Consent: To authorise the taking of groundwater for site dust suppression in accordance with Section 14 of the Resource Management Act 1991.

Works: A sump bore located approximately 280 metres west off Mt Eden Road.

Site Location: 987 Mt Eden Road, Three Kings

Legal Description of Land Where Water is Taken and Used: Lot 1 DP 37020 (CT 953/21)

Territorial Authority: Auckland City Council

Map Reference of Take Point: NZMS 260 R11 669759

Authorised Quantity: The Consent Holder shall ensure that:

- (a) The daily abstraction shall not exceed 1,000 cubic metres.
- (b) the combined daily abstraction under water permits 12799 and 31762 shall not exceed 7,550 cubic metres.
- (c) the annual abstraction over the 12 month period commencing 1 June of any year and ending 31 May of the following year shall not exceed 50,000 cubic metres.
- (d) the combined annual abstraction under water permits 12799 and 31762 over the 12 month period commencing 1 June of any year and ending 31 May of the following year shall not exceed 2,737,500 cubic metres.

DEFINITIONS:

- ARC: Means the Auckland Regional Council
- Manager: Means the Manager, Water Resource Allocation Section, Auckland Regional Council, or nominated ARC staff acting on the Manager's behalf.

GENERAL CONDITIONS:

1. That the servants or agents of the ARC shall be permitted access to the relevant parts of the property at all reasonable times for the purpose of carrying out inspections, surveys, investigations, tests, measurements or taking samples.

SUMP CONSTRUCTION CONDITIONS:

2. That the Consent Holder shall ensure that provision at the top of the sump for water level measurements shall be made and be maintained in accordance with the details outlined in this water permit (see Note 1).

MONITORING AND REPORTING CONDITIONS:

3. That prior to the exercise of this consent, the Consent Holder shall install, on the outlet of the pump a meter which shall measure the total quantity of water being taken. The water meter must be capable of measuring to an accuracy of at least plus or minus 5% and it is to display to at least 1 cubic metre. The meter is to be installed to the manufacturer's specifications and to the satisfaction of the Manager.
4. That the Consent Holder shall maintain the meter in accordance with the requirements of condition 3 and in working condition at all times.
5. That the Consent Holder shall read the meter required under Condition 3 above, at weekly intervals and keep records of each date and corresponding water meter reading. These records for the preceding quarter shall be submitted to the Manager, by no later than 10 working days after 28 February, 31 May, 31 August and 30 November each year.

REVIEW CONDITION:

6. That the conditions of this consent may be reviewed by the Manager pursuant to Section 128 of the Resource Management Act 1991, by the giving of notice pursuant to Section 129 of the Act, in December 2010 and subsequently at intervals of not less than five years thereafter in order:
 - a) to vary the quantities, monitoring and reporting requirements, and performance standards in order to take account of information, including the results of previous monitoring and changed environmental knowledge, on:
 - i) water availability, including alternative water sources;
 - ii) actual and potential water use;
 - iii) groundwater levels; and

- iv) groundwater quality;
- b) to deal with any adverse effect on the environment arising or potentially arising from the exercise of this consent.

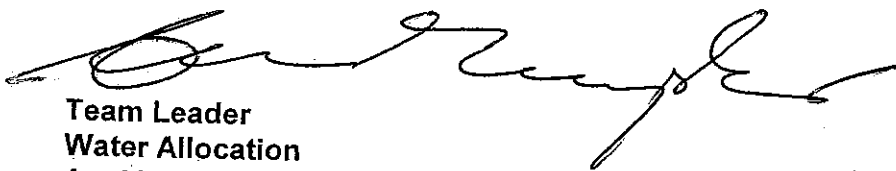

NOTES:

1. Adequate provision must be made at the wellhead so that a probe can be lowered vertically into the bore between the riser tube and casing to measure the static water level in the bore. This can be achieved by having an access hole of at least 2 centimetres in diameter at the top of the bore. In order to keep out foreign matter, the hole should be fitted with an easily removed plug. The probe hole shall be maintained to the specific dimensions and in working order at all times.
2. Adequate provision must be made at the wellhead so that a sample of water can be taken from the bore for water quality analysis. This can be achieved by fitting a tap or hand valve as close to the pump outlet as possible and before the water enters any storage tank or filter, and it should have approximately 0.3 metre clearance above ground level or other obstruction to allow a sample bottle to be filled. Provision for sampling shall be maintained to the specific dimensions and in working order at all times.

ADVICE NOTES:

1. The Resource Consent Holder is advised that they will be required to pay to the Council any administrative charge fixed in accordance with Section 36(1) of the Resource Management Act 1991, or any additional charge required pursuant to Section 36(3) of the Resource Management Act 1991 in respect of this consent.
2. The Resource Consent Holder is advised that the date of the commencement of this consent will be as determined by Section 116 of the Resource Management Act 1991, unless a later date is stated as a condition of consent. The provisions of Section 116 of the Resource Management Act 1991 are summarised in the covering letter issued with this consent.
3. The Resource Consent Holder is advised that, pursuant to Section 125 of the Resource Management Act 1991, this resource consent lapses on the expiry of five years after the date of commencement of this consent unless the consent is given effect to or other criteria contained within Section 125 are met.
4. The Resource Consent Holder is advised that, pursuant to Section 126 of the Resource Management Act 1991, if this resource consent has been exercised, but is not subsequently exercised for a continuous period of five years, the consent may be cancelled by the Council unless other criteria contained within Section 126 are met.

This consent has been granted by the Auckland Regional Council pursuant to the Resource Management Act 1991.
