Attention: Naveen Kumar, Water Resources Section

**Re: Quarterly Report for Three Kings Quarry, Permit 12977**

Dear

As required by Condition 7 of the above resource consent, please find enclosed records of groundwater level measurements for the period of 1<sup>st</sup> March 2017 to 31<sup>st</sup> May 2017.

Should you have any queries please do not hesitate to contact me on 027 504 3624 [angela.klein@gbcwinstone.co.nz](mailto:angela.klein@gbcwinstone.co.nz)

Yours faithfully

Angela Klein

**Groundwater Take To Dewater Three Kings Quarry**

**Quarterly Report**

**June 2017**

## **QUARTERLY REPORT**

### **Three Kings Quarry – Permit No 12977**

This report is made with regard to Condition 7 of Permit No 12977 and contains records for the period of 1<sup>st</sup> March 2017 to 31<sup>st</sup> May 2017.

The results of groundwater level monitoring within boreholes surrounding the take point have been provided for the reporting period.

A plan showing the location of boreholes in which groundwater levels were measured has also been included in this report.

Locations of boreholes are marked on the attached plan.

Waterlevels within standpipe piezometers are expressed as depth below surface levels (first column) and as elevations above sealevel (second column). Waterlevels within pneumatic piezometers are expressed as head of water above piezometer tip (first column) and as elevations above sealevel (second column). All values expressed in meters.

BH32 was destroyed by Roading Contractors in June 2011.

The pneumatic piezometer in BH28b stopped producing reliable results and monitoring ceased in July 2012. Waterlevels continue to be monitored by the piezometers installed in BH28a.

The pneumatic piezometers BH25b1 and BH25b2 stopped producing reliable results and monitoring of these ceased in April 2013 and November 2013, respectively. Waterlevels continue to be monitored by the standpipe piezometer BH25.

The pneumatic piezometers 31a and 31b stopped producing reliable result and monitoring of these ceased in January 2014 and July 2012, respectively. Waterlevels continue to be monitored by the standpipe piezometer installed in BH33.

As a result of fill activities the last monitoring round for BH2b was January 2015 with the decommission of this borehole undertaken in early February 2015. Waterlevels within the quarry will continue to be monitored by BH5b. Council was notified of the proposed substitution of BH5b for BH2b via email on 16 December 2014 with approval granted on 17 December 2014.
