

Dear Three Kings Community Member,

**RE: THREE KINGS QUARRY SITE LIAISON GROUP MEETING**

On behalf of GBCWinstone I would like to invite you to the upcoming Three Kings Site Liaison group meeting. This meeting is an opportunity for you to come along and learn more about the daily operations at the site and to ask company representatives any questions that you may have.

**When: Monday 29<sup>th</sup> May 2017**

**Time: 19:00 – 21:00**

**Where:** Fickling Convention Centre – Lynfield Room, 546 Mount Albert Road (There is ample parking directly outside.)

For your information, please find attached:

- A draft agenda of the upcoming SLG Meeting
- A summary of actions from the previous SLG Meeting
- An Executive Summary of the Site Monitoring and Quarry Operation Reports

Please forward any agenda items and/or apologies by 12 noon on Monday 29<sup>th</sup> May 2017 to Angela Klein on email: [angela.klein@gbcwinstone.co.nz](mailto:angela.klein@gbcwinstone.co.nz) or phone: 027 504 3624.

If you know of any others who would be interested in attending this meeting, please pass on this invitation.

All parties welcome.

Kind Regards,

Angela Klein  
**Environmental Fill Specialist**

If you do not wish to continue to receive such communications from GBC Winstone please advise Angela Klein (contact details are provided above).

# THREE KINGS QUARRY SITE LIAISON GROUP MEETING

Monday 29<sup>th</sup> May 2017

Please direct any enquiries, agenda items and/or apologies to Angela Klein, GBCWinstone Environmental Fill Specialist, phone 027 504 3624 or email [angela.klein@gbcwinstone.co.nz](mailto:angela.klein@gbcwinstone.co.nz)

# SUMMARY OF ACTIONS FROM PREVIOUS MEETING HELD ON 27<sup>TH</sup> FEBRUARY 2017

No actions from previous meeting.

## EXECUTIVE SUMMARY: MONITORING REPORT AND QUARRY OPERATIONS REPORT

### MONITORING REPORT

- **Groundwater Level Monitoring** - Groundwater levels are generally following seasonal trends with the groundwater level at Three Kings Quarry being held above RL34m.
- **Groundwater Chemistry Monitoring** - samples for chemical analysis are required to be taken at 6 monthly intervals from the Pumping Bore within Three Kings Quarry and from BH 7 on Landscape Road (March and September). The results from the March 2017 monitoring round have been received. All parameters were less than the trigger limits with the exception of Zinc recorded in BH7. BH7 currently has no direct groundwater link to Three Kings Quarry. Auckland Council and Watercare have been notified of the trigger exceedance.
- **Continuous Groundwater Quality Monitoring** - an upward drift in pH was recorded from January 2016 to July 2016. The electrode was replaced in July 2016 and is showing much more consistent results. A downward spike in the EC record in October 2016 was investigated and found to be a result of too high a flow in the sampling vessel.
- **Air Quality Monitoring** - Air Quality Monitoring equipment at Three Kings Quarry consists of two Continuous Real Time Beta Attenuation Monitors (BAM), time lapse video cameras and a metrological station. Air quality monitoring results recorded since the last SLG meeting have been less than 40 micrograms per cubic meter as a 24 hour average. No air quality triggers have been recorded since the last SLG meeting.
- **Noise Monitoring** - The next round of noise monitoring will be undertaken in June 2017.
- **Soakage Infrastructure ASCNMP** - In order to avoid, remedy and mitigate any adverse noise effects from the soakage infrastructure project, an Activity Specific Construction Noise Management Plan (ASCNMP) has been implemented. A copy of the ASCNMP can be found on our website: [www.threekingsquarry.co.nz](http://www.threekingsquarry.co.nz) under the "Management Plans & Regulatory Structure" tab. Alternatively, you can contact Angela Klein on 027 504 3624 or [angela.klein@gbcwinstone.co.nz](mailto:angela.klein@gbcwinstone.co.nz).

## QUARRY AND FILL OPERATIONS REPORT

- **Daily truck movements** - The total number of trucks to enter site per day has been below the consented limit of 375. An average of 90 trucks entered site per day over the last 6 months.
- **Pest Control** – Possum traps and rat bait stations continue to be checked and baited. Ten possums have been caught since the last SLG meeting.
- **Complaints/Incidents** – No complaints were received since the last SLG meeting.
- **Fill Weighted Rolling Mean** – All parameters are less than trigger limits.
