

Dear Three Kings Community Member,

RE: THREE KINGS QUARRY SITE LIAISON GROUP MEETING

On behalf of GBCWinstone and Fletcher Living I would like to invite you to the upcoming Three Kings Site Liaison group meeting. This meeting is an opportunity for you to come along and learn about operations at the site, future development and to ask company representatives any questions that you may have about the day to day site activities.

When: Monday 26th February 2018

Time: 19:00 – 21:00

**Where: Fickling Convention Centre – Waikowhai Room, 546 Mount Albert Road
(There is ample parking directly outside.)**

For your information, please find attached:

- A draft agenda of the upcoming SLG Meeting
- A summary of actions from the previous SLG Meeting
- An Executive Summary of the Site Monitoring and Quarry Operation Reports

Please forward any agenda items and/or apologies by 12 noon on Monday 26th February 2018 to Angela Klein on email: angela.klein@gbcwinstone.co.nz or phone: 027 504 3624.

If you know of any others who would be interested in attending this meeting, please pass on this invitation.

All parties welcome.

Kind Regards,

Angela Klein
Environmental Fill Specialist

If you do not wish to continue to receive such communications from GBC Winstone please advise Angela Klein (contact details are provided above).

THREE KINGS QUARRY SITE LIAISON GROUP MEETING

Monday 26th February 2018

To be held at the Fickling Convention Centre – Waikowhai Room
Commencing at 7pm and concluding 9pm

AGENDA

- **WELCOME**
Circulation of the Attendance Register
- **APOLOGIES**
- **CONFIRMATION OF PREVIOUS MINUTES**
- **MATTERS ARISING OF THE PREVIOUS SLG MINUTES**

Please direct any enquiries, agenda items and/or apologies to Angela Klein, phone 027 504 3624 or email angela.klein@gbcwinstone.co.nz

SUMMARY OF ACTIONS FROM PREVIOUS MEETING HELD ON 27TH NOVEMBER 2017

- **Action 1:** A. Klein to add Weed Management to future Agendas.
 - **Actioned.** Weed Management section added to Quarry Operations Report.

EXECUTIVE SUMMARY: MONITORING REPORT AND QUARRY OPERATIONS REPORT

MONITORING REPORT

- **Groundwater Level Monitoring** - Groundwater levels are generally following seasonal trends with the groundwater level at Three Kings Quarry being held above RL34m.
- **Groundwater Chemistry Monitoring** - samples for chemical analysis are required to be taken at 6 monthly intervals from the Pumping Bore within Three Kings Quarry and from BH 7 on Landscape Road (March and September). The next round of groundwater chemistry sampling is scheduled for March 2018.
- **Continuous Groundwater Quality Monitoring** - Continuous monitoring of electrical conductivity (EC) and pH is required to be undertaken in the Three Kings Quarry pumping bore. New pH & EC probes were installed at the Three Kings Quarry pumping bore in August 2015. The pH & EC probes are calibrated quarterly by an external technician and the pH electrode has been replaced annually in July 2016 and July 2017. No pH triggers have been recorded since the last SLG meeting.
- **Air Quality Monitoring** - Air Quality Monitoring equipment at Three Kings Quarry consists of two Continuous Real Time Beta Attenuation Monitors (BAM), time lapse video cameras and a metrological station. Air quality monitoring results recorded since the last SLG meeting have been less than 41 micrograms per cubic meter as a 24 hour average. No air quality triggers have been recorded since the last SLG meeting.
- **Noise Monitoring** – To ensure that the noise performance standards set in the District Plan and consents authorising filling are met, monitoring on two representative occasions per year is undertaken. Noise monitoring was undertaken on the 28th November 2017 by Marshall Day Acoustics Ltd. The cumulative acoustic emission from fill operations resulted in sound levels which complied with the relevant noise rules for consented operations on the site at both the Fyvie Avenue measurement position and the Grahame Breed Drive position.

QUARRY AND FILL OPERATIONS REPORT

- **Daily truck movements** - The total number of trucks to enter site per day has been below the consented limit of 375. An average of 41 trucks entered site per day over the last 6 months.
- **Weed Management & Pest Control** – Weed control within the site is undertaken fortnightly by an external company on an as needed basis by certified staff using nap sacks and best product for application. Possum traps and rat bait stations continue to be checked and baited. Four possums have been caught since the last SLG meeting.
- **Complaints/Incidents** – No complaints have been received since the last SLG meeting.
- **Deep Fill and Shallow Fill Weighted Rolling Means** – All parameters are less than trigger limits.
